General Notes	1
Discovery Layer	1
Searching.....	1

General Notes

This upgrade includes enhancements and fixes that have been tested by SCLS staff and staff at some libraries. To the best of everyone’s assessment, the fixes are working well and any bugs identified during testing have been fixed. However, as we learned with past upgrades and patches, we may experience unexpected results following the upgrade. We may also discover new problems. We will use the [Known Problems page](#) to document any post upgrade problems. **After the upgrade, please clear your browser’s cache before using Bibliovation.**

Discovery Layer

Advanced search data not retained unless user is logged in: In the Advanced Search, the search terms were not being retained unless the patron was logged in. This has been fixed. (SCLS Support Ticket 2318)

Searching

Increased caching of search strings in search fields: System was caching item search strings (barcode, title, author name, etc.) in various search fields and retaining the search in the masthead field in various screen despite moving around various links and screen. This has been fixed. (SCLS Support ticket 3925)
